

PRODUCT SPECS

14" ALUMINIZED ZETEX® HIGH HEAT GLOVE

High Heat Protection for Hands • Part #234-AZ

FEATURES

- 14" length
- Entire glove made from 25 oz. / sq. yd. aluminized Zetex® to reflect radiant heat
- Recommended for applications requiring heat reflectivity and molten splash resistance.
- Five-finger style
- Wool lined for extra insulation and protection
- **Part #234-AZ**

FABRIC INFORMATION

Aluminized Zetex® is a heavy, 25 oz. / sq. yd. fabric, made from a highly textured form of silica, with one side coated for better molten splash resistance. The fabric is aluminized to provide radiant heat protection up to 2000°F.
